INFORMATION DISCLOSURE STATEMENT

Sir:

Further to the above identified Application and in compliance with Rule 56 (37 C.F.R. 1.56), Applicant hereby wishes to call the Examiner's attention to the references listed on the enclosed form PTO-1449. A copy of each reference is also enclosed.

[X] No fee is due as this paper is filed prior to

[X] the issuance of the first action in this application.

[X] the expiration of three months from

[X] the present application filing date.

[] Applicant becoming aware of the cited reference. A certification under 37 CFR 1.97(e) is enclosed.

[] the mailing date of the Search Report from, or citation by, another Patent

Office. A copy of the Search Report/citation [] is/[] not enclosed.
[] the filing of the cited copending application.
[X] In the event that a fee is due with this paper in order to have it properly considered and acted upon, the Commissioner is authorized to charge Applicant's Deposit Account 03-1920 for the fee set forth in 37 C.F.R. § 1.17(p).

Each of the following patents relates in some fashion to cosmetic sticks. While the references are mentioned here as specifically disclosing certain aspects, each reference may actually relate to multiple components within the present invention and the following statement should not be deemed to be anything to the contrary.

1. US 4,202,879 and US 4,725,432 disclose fatty acid and fatty alcohol esters and water-insoluble ethers as emollients in cosmetic sticks.
2. US 4,822,603
3. US 4,917,882 relates to the use of polyethylene in a gel-type sunscreen
4. US 4,985,238; US 5,169,626; US 5,254,332; US 5,302,381; US 5,449,511; US 5,833,964; US 5,972,319; and US 6,048,518 relate to high refractive index, non-volatile liquid components to mask residue in low-residue anhydrous cosmetic sticks. These references are discussed at page 2 of the specification.
5. US 5,069,897; US 5,102,656; US 5,178,881; and 5,531,986 mention the use of polyethylene in wax based cosmetic sticks.
6. US 5,225,188 relates to the use of volatile and non-volatile silicones in combination.
7. US 5,750,096 and US 5,846,620 relate to the use of waxes having smaller crystal size than stearyl alcohol.
8. US 5,922,308 is directed to the use of anti-whitening agents.
9. US 5,082,652 discusses the use of an oil absorbent particulate material for preventing dusting of another component.

The Examiner is respectfully requested to consider the foregoing information in relation to this application and to indicate that each of the references was considered by returning a copy of the initialed PTO 1449 form(s).
